

PTO (Power Take Off) Cruising Compressor

Description

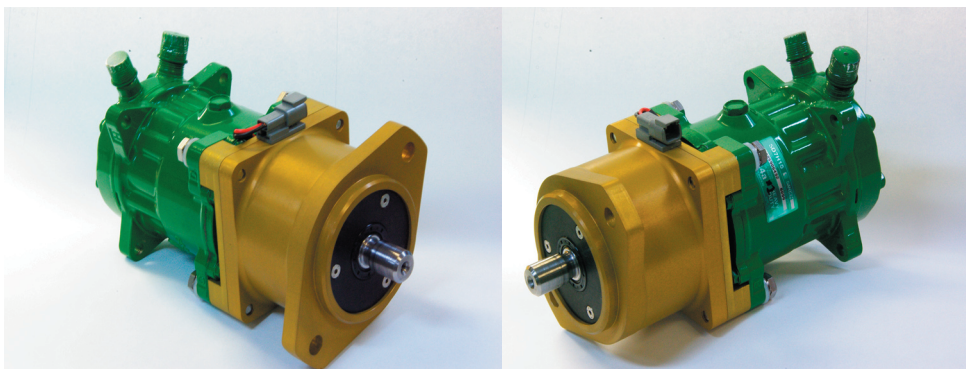

This Sanden Compressor (Model SD7L15) is a refrigeration or air conditioning compressor. It uses the power from the propulsion or engine of any vehicle either on water or land. This saves the use of a separate generator.

Features

- The unit is attached to the PTO with a B2 bolt. It is designed for use with 404a gas.
- Very easy installation. The unit simply bolts on to the PTO after removing the cover plate. It can be connected to any condenser that matches the capacity of the compressor.

Specifications

Compressor Speed (rpm)	1000	2000	3000
Cooling Capacity (w)	5472	10405	13973
Power Consumption (w)	2630	5931	9199
COP	2.08	1.75	1.52
Clutch	12v or 24v		
PTO	B2 Bolt		
Other PTO available by special order
